Bluestone Energy Services Celebrates 20 Years of Energy Conservation

Company continues to grow despite challenging economic climate

Norwell, Mass – January 21, 2010 – Bluestone Energy Services, LTD., a leader in energy conservation engineering and project development services for industrial and commercial clients, today announced its twenty year anniversary. Founded at the kitchen table of Peter and Roberta Fairbanks in 1990, Bluestone Energy has become one of the leading energy conservation firms in the Northeast.

Over the last twenty years, Bluestone has helped hundreds of companies implement energy-efficiency upgrades and secure utility incentives and credits. Bluestone has worked closely with utility incentive programs to better serve their customers, and has been recognized for this by becoming a “Project Expeditor” for National Grid and a “Preferred Engineering Vendor” for NSTAR among other trade ally programs.

In 2008, Bluestone Energy Services received the distinction of “Energy Project of the Year” from *The Association of Energy Engineers* in recognition of work it completed on behalf of Cambridge, Mass-based EF Education.

In the last year alone, despite the challenging economic climate, Bluestone has launched a data center division, opened two new regional offices in Buffalo and Baltimore, acquired a controls company, and has grown its workforce by forty-five percent.

“I am thrilled with Bluestone’s success for the last twenty years,” said Peter Fairbanks, President of Bluestone Energy Services. “Over the years we have built a dedicated staff and adapted to the changing environment. Through it all we have continually strived to provide our customers with cost-effective energy conservation projects that reduce their expenses and carbon footprint.”

About Bluestone Energy Services

Since 1990, Norwell, Mass-based Bluestone Energy Services has been providing professional engineering and project development services for industrial and commercial clients. Bluestone is a leader in demand-side management (DSM) programs for large commercial and industrial customers. Having developed and implemented hundreds of lighting, HVAC, and process energy conservation projects, Bluestone’s engineers have secured millions of dollars in utility incentives for clients. Bluestone has worked with a wide array of companies including Boston Properties, Cabot Corporation and Stop & Shop Supermarket Company.
