Bluestone Energy Assists The Greener Chelmsford Initiative

Bluestone will offer comprehensive energy audits for participating organizations

Chelmsford and Norwell, Mass – June 2, 2009 – Bluestone Energy Services, LTD., a leader in energy conservation engineering and project development services for industrial and commercial clients, announced today that they will be assisting the Greener Chelmsford Initiative, (GCI) a town wide energy initiative that will engage residents and businesses in a voluntary effort to reduce their energy consumption and environmental impact.

Bluestone Energy has agreed to provide free energy audits to any participants with a power draw of 200kW or more. The energy audits will help companies take the next step to ensure that their facilities are operating at maximum efficiency and help lay the groundwork for participants to receive incentives for local utilities.

“We are delighted that Bluestone Energy has stepped forward to help Chelmsford’s business community take the next step to reduce their environmental impact and we encourage other companies to get involved,” said Eric Dahlberg, Chelmsford Selectman and GCI Co-founder

Since the GCI kicked off on April 22nd, five organizations (Moonstones, Harrington Wine and Liquors, the Town of Chelmsford, the Java Room and Chelmsford Public Library) have been presented with GCI Seals of Approval.

“We’re excited to be part of this important initiative. There are tremendous opportunities for companies to cost-effectively reduce their environmental impact, receive utility incentives and significantly impact their bottom line in a positive way,” said Peter Fairbanks, President of Bluestone Energy.

About Bluestone Energy Services

Since 1990, Norwell, Mass-based Bluestone Energy Services has been providing professional engineering and project development services for industrial and commercial clients. Bluestone is a leader in demand side management (DSM) programs for large commercial and industrial customers. Having developed and implemented hundreds of lighting, HVAC, and process energy conservation projects, Bluestone’s engineers have secured millions of dollars in utility incentives for its clients. Bluestone has worked with a wide array of companies including Boston Properties, Cabot Corporation and Stop & Shop Supermarket Company.

About the Greener Chelmsford Initiative

Businesses and residents participating in the GCI will be presented with a GCI Seal of Approval after committing to a number of “green activities” (out of an initial pre-approved list of twenty five). They will also be recognized by the town. GCI volunteers will engage in outreach and public education, aimed especially at young people, to communicate the impact that participants are having. GCI volunteers will also check-in with participants periodically to assess progress and offer assistance. The GCI is being directed by Badhri Uppiliappan and will be of no additional cost to the taxpayers.

Additional information on GCI can be found at <http://www.townofchelmsford.us>.
